

MONDAY EVENING NETWORKING  
EVENT

International Spy Museum

[www.spymuseum.org](http://www.spymuseum.org)

Through interactive exhibits with state-of-the-art audiovisual effects and hands-on components, the International Spy Museum traces the evolution of espionage through the people who practiced the profession and provides a context for guests to interpret the role intelligence plays in current events. The Museum's permanent exhibition presents the trade/craft of espionage and showcases the ingenuity and imagination of real-life spies and spymasters.

Guests adopt a cover, break codes, identify disguised spies and become the subjects of covert surveillance throughout their visit. Through these interactive experiences and immersive environments, the Museum examines actual events, reveals true stories and presents hundreds of authentic tools of the spy trade.

Following our experience at the International Spy Museum, the group will head to Austin Grill ([www.austingrill.com](http://www.austingrill.com)) for dinner.
